

## jQuery DOM

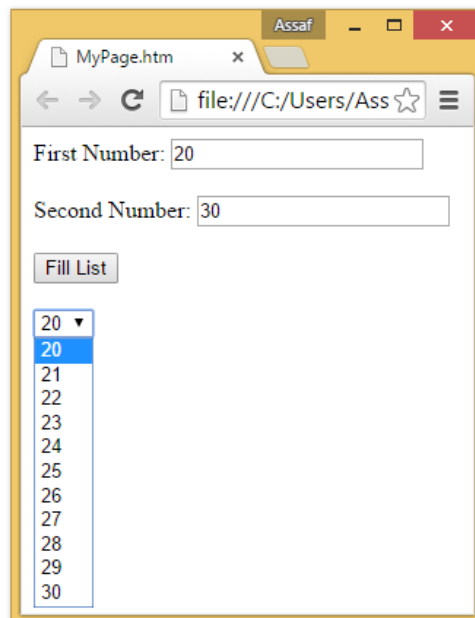

עצבו את הדף הבא:

A screenshot of a web browser window titled "Assaf" showing a file named "MyPage.htm" at the address "file:///C:/Users/Assaf". The page contains a form with the following elements:

- "First Number:" followed by an empty text input field.
- "Second Number:" followed by an empty text input field.
- A button labeled "Fill List".
- A dropdown menu with a downward arrow.

בלחיצה על הלחצן, הכניסו לתיבת ה-select את כל המספרים בטווח שהמשתמש הכניס. לדוגמה, עבור הכנסת 20 ו-30, יש למלא את תיבת ה-select בצורה הבאה:

The same web browser window is shown, but the "Fill List" button has been clicked. The form now displays:

- "First Number:" followed by an input field containing the value "20".
- "Second Number:" followed by an input field containing the value "30".
- The "Fill List" button is still present.
- The dropdown menu is now open, showing a list of numbers from 20 to 30. The number "20" is highlighted in blue.

בהצלחה 😊
